A play on the high dimensionality of the Odessa panel, the Odessa Flat is its inverse. Instead of creating height with felt tabs on end, this panel seems to dig below the surface. Like the arroyos that crisscross our New Mexico home, Odessa Flat maps a series of shallow, offset but connected channels.

### FELT

Wool felt is one of the oldest man-made textiles. A biodegradable and renewable material, wool felt is moisture resistant, self-extinguishing, and known for its thermal and acoustic insulation properties. We employ Filzfelt products which are German-milled, 100% wool manufactured. This Merino wool is sourced primarily from Australia, New Zealand, and South Africa. Slight variation in color is a result of the manufacturing with a natural material.

These hardwoods are grown domestically and whenever possible we source wood from the Southwest. We take the use of ethically and sustainably sourced materials seriously. We make every effort to acquire wood from responsibly managed forests that provide environmental, social, and economic benefits.
